Overview of the Power Cloud PR-512 with MaxiComfort

The Power Cloud with MaxiComfort by Golden Technologies is the re-imagined sibling of the fan-favorite Cloud lift chair. The Power Cloud offers the same ultra-comfortable design and great features as its predecessor but has the added benefit of the power articulating headrest.

What Makes This Different

Golden's MaxiComfort series offers unique Zero Gravity positioning which was developed by NASA. Zero Gravity positioning raises the upper and lower half of the body simultaneously to eliminate pressure during repositioning. With this knowledge, Golden implemented Zero Gravity positioning into their MaxiComfort line. Not only is pressure eliminated while the chair repositions, the chair also reclines far enough that the feet are positioned slightly above the heart which reduces swelling in the legs, ankles, and feet. This positioning is known as the Trendelenburg position.

All MaxiComfort chairs also feature one-of-a-kind programmable hand controls, which allow you to save your favorite positions for later. Each chair comes with a pre-programmed position that you can change to fit your exact needs.

Why We Like It

The Power Cloud is incredibly comfortable. With its overstuffed back, padded chaise, unique bucket seat that perfectly cradles the body, and articulating headrest, you won't find a more comfortable chair. The user also has the capability to operate the chair back and footrest independently which allows for a completely customizable experience tailored to your comfort. This MaxiComfort chair has a pocket located on each side of the chair for storage of magazines, remotes, etc.

What You Need to Know When Ordering

Consult with your physician prior to use of the Trendelenburg position.

Unless otherwise specified, your chair is brought to the curb. If you or your loved one require assistance in bringing the chair inside the home or setting it up, you should consider our 'White Glove' delivery service.

*This chair ships in a 39" x 39" x 47.75" box and may not fit inside some standard doors.

*Lead times are not cumulative

Unboxing Your Golden Lift Chair. Golden lift chairs ship fully assembled on a wooden pallet. You'll need to remove the shipping carton and protective plastic wrapping from the chair. It's usually best to have two people lift the chair off the wooden pallet and into the home. There will be a few twist ties around the power cords and remote cable to remove.

Golden lift chairs are Proudly Made by Americans; with domestic and imported materials.

"Lifetime Warranty" on Brisa fabrics by UltraFabrics

The most common kind of warranty on goods is a warranty that the product is free from defects in materials and workmanship. This simply promises that the Ultrafabrics properly constructed the product, out of proper materials, and implies the products will perform as well as such products customarily do.
